CLAIMS

We claim:

- 1. In a non-solid structural polyurethane adhesive composition comprising a polyurethane prepolymer reaction product of a polyisocyanate and a polyol composition and a curative for isocyanate groups, the improvement which comprises a polyurethane prepolymer reaction product consisting essentially of at least 80 wt% perfect prepolymers and less than 2 wt% free polyisocyanate monomer.
- The structural adhesive of Claim 1 in which the polyurethane prepolymer reaction product consists essentially of at least 90 wt% perfect prepolymers.
- 3. The structural adhesive of Claim 1 in which the polyurethane prepolymer reaction product consists essentially of less than 0.5 wt% free polyisocyanate monomer.
- 4. The structural adhesive of Claim 1 in which the polyisocyanate is hexamethylene diisocyanate, phenylene diisocyanate, toluene diisocyanate (TDI)
 4,4'-diphenyl-methane diisocyanate (MDI), isophorone diisocyanate (IPDI) or bis-(4-isocyanatocyclohexyl) methane.
- The structural adhesive of Claim 1 in which the polyol is a polyether polyol or a polyester polyol.
 - The structural adhesive of Claim 5 in which the polyol is a polyether polyol or a polyester polyol.

- 11. A method for adhesively joining or sealing two substrates using a structural polyurethane adhesive composition which comprises applying onto a substrate the non-solid structural polyurethane adhesive composition of Claim 1, and contacting the adhesive composition disposed on the substrate to a second substrate such that a bond is formed.
- 12. The method of Claim 11 in which the polyurethane prepolymer reaction product consists essentially of at least 90 wt% perfect prepolymers.
- 13. The method of Claim 11 in which the polyurethane prepolymer reaction product consists essentially of less than 0.5 wt% free polyisocyanate monomer.
- 14. The method of Claim 11 in which the polyisocyanate is hexamethylene diisocyanate, phenylene diisocyanate, toluene diisocyanate (TDI), 4,4'-diphenylmethane diisocyanate (MDI), isophorone diisocyanate (IPDI) or bis-(4-isocyanatocyclohexyl) methane.
- 20 15. The method of Claim 11 in which the polyol is a polyether polyol or a polyester polyol.
 - 16. The method of Claim 15 in which the polyol is a polyether polyol or a polyester polyol.
